For more information about mold and asbestos and steps to protect yourself, visit [www.state.nj.us/health/er/documents/prepare_before_cleanup_flyer.pdf](http://www.state.nj.us/health/er/documents/prepare_before_cleanup_flyer.pdf).

To determine if mold is present, examine for water damage. Mold can grow on materials like paper, fabric, or wood. Use protective gear such as masks and gloves, especially if you have respiratory or skin conditions.

For more information about mold and asbestos, visit [www.cancer.org](http://www.cancer.org).

As Hurricane Sandy recovery and cleanup continue, the New Jersey Poison Information and Educational System (NJPIES) can assist. Call NJPIES at 1-800-222-1222 for information.

Poisoning can occur from medications, including prescription, over-the-counter, herbal pills and vitamins. Other sources of poisoning that can be dangerous include household items like cleaning supplies and household chemicals.

National Poison Prevention Week - March 17 to 23

Poisoning can occur from medications, including prescription, over-the-counter, herbal pills and vitamins. Other sources of poisoning that can be dangerous include household items like cleaning supplies and household chemicals.

For more than 50 years, National Poison Prevention Week has been observed each year to raise awareness about poisoning prevention. This year's theme is "Protect Your Family, Not the Poisons." The week is sponsored by the American Association of Poison Control Centers with support from the U.S. Centers for Disease Control and Prevention (CDC).

Each year, more than 1 in 3 older adults will fall, which can lead to serious injury or death. Falls are among the leading causes of injury deaths in older adults, and are major causes of hospitalization, emergency department visits, and nursing home admissions. For more information about falls and ways to reduce the risk, visit [www.cdc.gov/falls](http://www.cdc.gov/falls).

The Office of Emergency Management's Disaster Recovery Unit (DRU) is available to assist throughout the process. Any questions about applying for federal or state disaster assistance should be directed to the DRU. The DRU can be reached at 1-800-922-DELA (3352).

FEMA recommends that nonprofit agencies damaged as a result of Hurricane Sandy can apply for reimbursement of disaster-related costs. The Federal Emergency Management Agency (FEMA) is offering assistance to eligible nonprofit agencies that have sustained damage as a result of Hurricane Sandy. Nonprofit agencies can apply for assistance through the Nonprofit Assistance Center, which is available to assist throughout the process. Any questions should be directed to the Nonprofit Assistance Center. The Nonprofit Assistance Center can be reached at 1-800-922-DELA (3352).

As a result of the statewide devastation caused by Hurricane Sandy, New Jersey is working to make sure every community has the resources they need to recover. The state has established a series of resources that may be able to help. For more information, visit [www.state.nj.us/education/amistad](http://www.state.nj.us/education/amistad).

For more information about Black History Month, visit [www.state.nj.us/education/amistad](http://www.state.nj.us/education/amistad).

Africans and African descendants are an integral part of the development of American society in global context. The Commission has developed a history curriculum for the state of New Jersey that will establish a diverse, accurate, and inclusive history of African Americans in the United States.

Africans and African descendants have contributed to every aspect of our state and nation's history. Since February 2007, the State of the Children's Dental Health: Making Coverage Matter has been implemented. The State of the Children's Dental Health report is released annually to provide a comprehensive overview of the children's oral health in the state of New Jersey.
