Radiation Oncology Claim Resolution Matrix 2013

The matrix below contains all of the CPT-4 codes for which National Imaging Associates (NIA) authorizes on behalf of Horizon NJ Health. This matrix is designed to assist in the resolution of claims adjudication and claims questions related to those services authorized by NIA. If a procedure is billed under any one of the given codes for that grouping and a valid authorization number has been issued within the date of service validity period, the charge for any of the codes should be allowed.

If a family of CPT codes is not listed in this matrix, an exact match is required between the authorized CPT code and the billed CPT code. If the exact match does not occur, the charge should be adjudicated accordingly.

*Please note: Services rendered in hospital inpatient setting are not managed by NIA.

The radiation oncologist is required to obtain a medical necessity review for **Accelerated Partial Breast Irradiation (APBI)**. The **breast surgeon** will receive approval for the insertion of the catheters if APBI is approved as medically necessary. The surgeon can request a review for approval at www.RadMD.com or call NIA's call center at 1-800-642-7299.
